

AMIN KHANI

Backend Software Engineer (Django) | Security & DevOps

09139302910 aminkhani.dev@gmail.com linkedin.com/in/aminkhanidev aminkhani.ir

WORK EXPERIENCE

Software Engineer

Fardaad Co.

2024 - 2026 Esfahan

<https://fardaadco.ir/>

- Designed and developed secure backend services using **Django** and **Django REST Framework**.
- Implemented **patch management** workflows, reducing exposure to known vulnerabilities.
- Conducted **vulnerability assessments** using **CVE** and **NVD databases** and tracked remediation lifecycle.
- Applied **system hardening** policies based on **CIS benchmarks** and security compliance standards.
- Designed and deployed an **SSH firewall handler**, significantly reducing unauthorized access attempts.
- Performed **security audits** and **compliance checks** using industry-standard tools.
- Collaborated with **DevOps** pipelines to ensure continuous security monitoring and improvement.

Security Solutions Deployment Engineer

Andisheh Pardazan e Sepahan Co (APS-Co)

05/2026 – 10/2026 Esfahan

<https://aps-co.net/>

- Deployed** and configured enterprise security platforms — including **Kaspersky Next EDR Expert** and **XDR Expert** — across client environments running **Docker** and **Kubernetes**.
- Consulted** with client IT administrators and security admins to integrate new security tooling into existing infrastructure, resolving deployment and compatibility issues across **Linux**, **Windows**, and containerized environments.
- Assisted in configuring **SOC** workflows, **threat detection**, **Malware** and **incident analysis**.
- Resolved complex system, network, and software compatibility issues during large-scale deployments.

PRODUCT

Automated System Hardening Framework (SECAP)

<https://github.com/aminkhani/secap>

Built a **Django-based** compliance automation platform to replace manual, error-prone CIS/DISA STIG audits with a centralized, automated hardening pipeline for **Windows** and **Linux** fleets.

- Designed and implemented automated security **audit** and **remediation** modules for Linux and Windows.
- Engineered a Django backend with **100+ automated CIS Benchmark** and **DISA STIG** control checks, replacing manual per-host audits with a single automated scan.
- Built **modular audit** and remediation engines for Linux and Windows that detect misconfigurations and enforce secure baseline policies without manual intervention.
- Designed a **rule-based** compliance engine mapping **system state** (services, permissions, registry/config values) to pass/fail results, with automated remediation for failed checks.

EDUCATION

Bachelor's Degree in Computer Engineering

University of Kashan

09/2021 - 09/2024 Kashan

Grade

16 / 20

- Undergraduate Project:** Sentiment Analysis using Semi-Supervised GAN
- Ranked **1st in Reinforcement Learning** (Master's-level optional course, **19 / 20**)

PROJECTS

<https://github.com/aminkhani/projects>

SKILLS

Backend & Frameworks

Django Django REST framework FastAPI
Django Channels Celery GeoDjango

Databases & Caching

PostgreSQL Redis MongoDB PostGIS

DevOps

Docker Kubernetes Ansible Prometheus
Grafana Nginx Traefik CI/CD GitLab
GitHub Actions ELK Shell Scripting

Security & Networking

Patch & Vulnerability Management OS Hardening
Malware Analysis LPIC-1 Network+ Security+
